Magic! Painless editing

Use Enhance to make your pics pop. It tweaks color, contrast, brightness; fixes red eyes; and even straightens a slanted horizon.

Less magic, but more control

Filters, contrast, and colors—oh my!

1. Select a photo and then select Edit.

2. Select the thing you want to change over here.

3. Make the actual change over here.
   Most changes require a single tap or click, but you might need to drag the white dot to make the change.

4. Dare to compare.
   Make a change and then press-and-hold the Compare button to see the before, and let go to see the after.

Keep it moving

Cut to the chase—or any other part of your video.

Select the Trim button

Move the white dot on the left
It’s where the video will start.

Move the white dot on the right
This is where the video ends.

The blue dot indicates where the video will start when you press Play.
Capture it

Grab the perfect moment from a video and save it as a photo.

Pause the video and press-and-hold or right-click. Select "Save photos from Video." Move the blue dot to where you want a pic from. Go forward or back one frame at a time.

Slow it down

Increase the drama by highlighting the best moment in slo-mo.

1. Select More •••
2. And then Create slow motion video
3. Pick a speed for the slo-mo effect

4. Move the blue dots to change the duration of the slo-mo effect
   If you choose the slowest speed, you’ll have just one blue dot to move.

5. Move the white dots to trim the video
